

PortaCabin Central Cold Stores

Hygiene Solutions

Hygienic Wall and Ceiling Solutions

Main Issues in PortaCabin Chillers:

Portacabin Chillers endure heavy use throughout their lifetimes and often are finished with materials that allow mold and mildew growth. They also have the following issues:

- Rust on walls of chiller
- high levels of fungus and bacteria due to poor finishes leading to failure of food safety requirements and odours
- Peeling of painted surfaces further leading to more corrosion
- Damage to panels due to impact and heavy duty usage
- damage to panels due to heavy cleaning chemicals
- Difficult to renovate panels without dismantling existing room

Recommended Finishes

Glasbord® with Surfaseal® for Walls and Ceilings
